

Product Sheet

HCM-CSHL-0056-C18 (ATCC® PDM-1™)

Please read this **FIRST**

Storage Temp.
**liquid nitrogen
vapor phase**

Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Complete Growth Medium

To prepare the complete medium for this organoid please refer to the [Organoid Media Formulation #1](#).

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: HCM-CSHL-0056-C18 (ATCC® PDM-1™)

Description

Organism: *Homo sapiens*, human

Tissue: cecum

Disease: Primary Adenocarcinoma

Age: See associated clinical data for patient profile information, if available.

<https://portal.gdc.cancer.gov/>

<https://portal.hcmi.cancercollaboratory.org/>

Gender: male

Morphology: organoid

Growth Properties: embedded 3D culture

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

SAFETY PRECAUTION

ATCC highly recommends that protective gloves and clothing always be used and a full face mask always be worn when handling frozen vials. It is important to note that some vials leak when submersed in liquid nitrogen and will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vessel exploding or blowing off its cap with dangerous force creating flying debris.

Unpacking & Storage Instructions

1. Check all containers for leakage or breakage.
2. Remove the frozen cells from the dry ice packaging and immediately place the cells at a temperature below -130°C , preferably in liquid nitrogen vapor, until ready for use.

Handling Procedure for Frozen Cells

Seeding density: We recommend seeding this model at $0.25 - 1 \times 10^6$ viable cells in 100 μL of ECM per well of a 6-well plate.

ECM: We recommend culturing this model in ATCC CellMatrix or Corning Matrigel. Include 10 μM ROCK Inhibitor Y-27632 (ATCC ACS-3030) in medium for the first 2-3 days following subculture.

For a brief overview of the thawing procedure see our quickstart guide [Thawing Cryopreserved Human Organoids](#).

Subculturing Procedure

Initiating culture from frozen vials: For a brief overview of the thawing procedure see our quickstart guide [Thawing Cryopreserved Human Organoids](#).

Seeding density: $0.25 - 1 \times 10^6$ viable cells in 100 μL of ECM per well of a 6-well plate. Alternatively, split at 1:2-1:4 every 7-10 days. For example, collect organoids from 100 μL of extracellular matrix (ECM) from a single well of a 6-well plate and re-seed into 2-4 wells of a 6-well plate in 100 μL ECM per well.

Media renewal: Perform a complete medium change every 2-3 days. Include 10 μM ROCK Inhibitor Y-27632 (ATCC ACS-3030) in medium for the first 2-3 days following subculture.

For a brief overview of the subculture and expansion of organoids see our quickstart guide [Subculture and Expansion of Human Organoids Protocol](#).

For more details on the handling and culture of organoids see our methods paper in [Current Protocols in Cell Biology](#)

Cryopreservation Medium

We recommend cryopreserving this model in ATCC Stem Cell Freezing Media (ATCC ACS-6000). For a brief overview of the cryopreservation procedure for organoids see our quickstart guide [Organoid Cryopreservation Protocol](#).

For more details on the handling and culture of organoids see our methods paper in [Current Protocols in Cell Biology](#).

Comments

Next-generation cancer model from the Human Cancer Models Initiative (HCMI). Refer to the following websites

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of materials on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of such materials.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org
